

# GOERZ LENSES

GOERZ OPTICAL PRODUCTS have now been sold in the American market for well over thirty years.

In that time they have established their reputation as

## Goods of Quality

and "GOERZ" is considered today the standard for optical precision.

Our constant aim is to maintain this position in America.

We manufacture Goerz Photographic Lenses such as the

**Dagor F: 6.8**

**Hypar F: 3**

**Dogmar F: 4.5**

**Artar F: 9-F: 15**

**Gotar F: 8**

These lenses are being widely used by the U. S. Government, by Photo Engravers, Portrait and Commercial Photographers, Motion Picture Producers, and thousands of Amateur Photographers. To the latter class we also offer a number of very desirable models in precision plate and roll film cameras. We also undertake special work along optical and mechanical lines in our New York factory.

***I** F YOU WANT THE BEST in photographic lenses, we are sure to be able to supply them. If you have problems to solve into which precision optics and mechanics enter, we offer you our experience and factory equipment to help you solve them.*

**C. P. Goerz American Optical Company**

317 EAST 34th STREET, NEW YORK, N. Y.

# PRACTICAL PHOTOGRAPHY

Your needs — your problems — your interests have been our sole aim in writing this new series of books. For thirty years we have been in close touch with photographers in every sphere of activity, and these books present to you the results of our investigations of their ideas and methods. Consequently they are practical in every sense of the word and will prove of the utmost help to you, as they are based on the knowledge of photographers who have been through the experiences and difficulties that you are now meeting. Eleven are now ready and others will follow as rapidly as possible.

- No. 1. **The Secret of Exposure** (Out of print).
- No. 2. **Beginners' Troubles**
- No. 3. **How to Choose and Use a Lens**
- No. 4. **How to Make Prints in Colors**
- No. 5. **How to Make Enlargements**
- No. 6. **How to Make Portraits**
- No. 7. **How to Make Lantern Slides**
- No. 8. **The Elements of Photography**
- No. 9. **How to Retouch Negatives**
- No. 10. **Practical Printing Processes**
- No. 11. **Modern Development**
- No. 12. **Manual of Bromoil and Transfer**

Each book is illustrated wherever necessary to make the text clearer. They are of a size that conveniently fits the coat pocket. Bound in paper for use in the field or workroom, **40 cents each**; bound in red cloth for the library, **75 cents** (not all numbers now obtainable).

*Your Success In*

# PHOTOGRAPHY

---

**E**VERY reader of this volume is seriously interested in the success of his photographic efforts. Of this we feel assured — otherwise he would not have purchased this book to secure information that brings successful results. Information! That is the secret of good results — backed by experience. Information must be up-to-date, authentic, and to be valuable the useless facts must be weeded out from the practical “meaty” matter, and the net result presented to the reader. This is what the Editors are doing not only in this series of books, but in our monthly magazine AMERICAN PHOTOGRAPHY as well. For more than thirty years this magazine has served the American photographic public, and endeavored to be all that its name implies — the standard American photographic magazine. It covers the whole field of photography for amateur, professional and commercial workers, publishing each month forceful articles on the best current practice and latest advances in each of these classifications. The departments include: “The Photographic Review,” abstracting important articles from the world’s photographic press, “The Cine Amateur,” for users of motion picture cameras of all sizes and makes. “Practical Hints,” “Questions and Answers,” “Nature and Wild Life,” “Exchange List,” for the exchange of prints; “The Market Place,” listing the most recent information as to firms buying pictures and treating of selling problems, “Notes and News” of clubs, books and exhibitions. In short, we publish a reader’s magazine, and in addition place our Editorial Staff at the service of our friends, to help them with perplexing problems. This means you!

Does a magazine published along such lines meet your ideas of good service? We think it does, for we try to put ourselves in our readers’ positions when we consider a change in the makeup of the magazine. Join our steadily increasing circle of readers and friends. The subscription price is \$2.50 per year, including personal editorial help when you need it. Send your subscription today and look forward to twelve numbers of the best photographic literature that you have ever read.

*The Ideal Book on Bromoil*

**BROMOIL PRINTING**

AND

**BROMOIL TRANSFER**

By DR. EMIL MAYER

Translated by FRANK ROY FRAPRIE, F. R. P. S.  
Editor of AMERICAN PHOTOGRAPHY

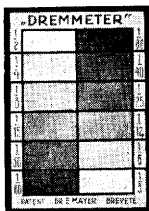

Bromoil has been rated as one of the most difficult problems to master, largely because of the inadequacy of the published information on the process. Dr. Mayer's book contains the results of exhaustive experiments which have cleared up practically all the difficulties inherent to the bromoil process. It is a masterly piece of exposition and is specially valuable to the amateur who desires to learn this process, because it describes a single plan of work without variation. The book also contains full and explicit directions for all varieties of bromoil transfer.

The "British Journal of Photography" says: "It is a matter of unqualified pleasure that such an authoritative handbook should have been made available to English-speaking photographers. . . . The process of making a bromoil print is treated, step by step, and at each stage such detailed directions and convincing reasons are given as to leave no room for the doubts and misgivings which many books of instructions leave in the minds of their inexperienced readers. . . . We have nothing but commendation for the volume."

The volume contains 199 pages, size 5½ x 8, bound in red cloth.  
Price \$2.50.

AUTOMATIC EXPOSURE METERS

# JUSTOPHOT and CINOPHOT

*A Perfect Bromoil Requires a Perfect Negative*

---

These meters time exposures automatically with scientific precision under all conditions of illumination, without tables and computations, without sensitized paper, without extinguishing wedges.

They are independent of altitude, climate, hour, season and geographical position.

Permanently adjustable to individual eyesight.

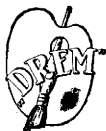

Correct exposures for sun and twilight, studios, interiors, reproductions, mountain scenes and sea scapes, daylight or artificial light.

Direct reading for Extra Rapid material (ER), like roll-film, par-speed cut film, normal Cine film, etc.

Sole leather cases, hand sewn, are supplied with every instrument. These cases are provided with means to carry the meter on the belt, attached to a button, or alongside the camera case; they permit the meter to remain for instant use at whatever adjustment corresponds to the user's eyesight.

Models, marked I, are for nearsighted persons, and models, marked II, are for far-sighted users; normal or almost normal eyesight permits the use of either model.

# THE PHOTOGRAPHIC ANNUALS

No matter what other photographic literature you read, one or more of the annuals should be added to your library each year. They bring together under a single cover material which could not be easily compared in any other way. The pictorialist, especially, will find the annuals invaluable in studying ruling tendencies and checking up the progress made from year to year.

## THE NEW AMERICAN ANNUAL OF PHOTOGRAPHY

Under new editorship the 41st volume of this annual will have a greatly enlarged page and will be printed on the finest matt surface coated paper, to show off more beautifully a collection of the finest American pictorial photographs of the year. The articles are specially written by experts and cover a large variety of both pictorial and technical topics, including negative making, portrait lighting, amateur motion picture work, desensitizing plates, exhibitions and exhibition prints, recovering silver from exhausted baths and a comprehensive review of all that has been done in photography in the previous year. Lists of the world's salons and open exhibitions, of American pictorialists and American camera clubs, together with a formulary, are included.

Price, paper, \$1.50, cloth, \$2.25, postpaid.

## THE BRITISH JOURNAL PHOTOGRAPHIC ALMANAC

The same big book with its wonderful advertising section, practical articles, formulas and tables, and a repetition of last year's feature of pictorial photogravure illustrations, increased in number. Price, paper, \$1.00, cloth, \$1.50. Postage, 1st and 2nd zones, 1-150 miles, 9c.; 3rd zone, 150-300 miles, 12c.; 4th zone, 300-600 miles, 17c.; 5th zone, 600-1000 miles, 22c.; 6th zone, 1000-1400 miles, 27c.; 7th zone, 1400-1800 miles, 33c.; 8th zone, over 1800 miles, 38c.

## PHOTOGRAMS OF THE YEAR 1926

The international annual of pictorial photography, containing selected prints from the best workers of all countries with interesting text. Reduced price, paper, \$2.25, cloth, \$3.25.

## THE YEAR'S FINEST PICTORIAL PHOTOGRAPHS

A volume of full-page photographic reproductions by masters of photography, each one accompanied by an extended and valuable criticism by F. C. Tilney. Price, paper, \$2.00.

For sale by all dealers, or

**AMERICAN PHOTOGRAPHIC PUBLISHING COMPANY**

428 Newbury Street

Boston 17, Mass.

# THE PHOTOGRAPHIC ANNUALS

## THE PICTORIAL ANNUAL OF THE ROYAL PHOTOGRAPHIC SOCIETY

A volume of reproductions of the finest photographs from this year's Royal Photographic Society Exhibition with a running commentary and criticism by Tilney. One of the most beautiful of all the annuals. Price, paper, \$2.25, cloth \$3.25.

## PENROSE'S ANNUAL

The Process Year Book and Review of the Graphic Arts, 1927. This book contains valuable articles on the year's progress in photo-engraving and printing methods with beautiful monotone and full color reproductions by all the most beautiful processes known. Reduced price, cloth \$3.50.

## CAMERAGRAPHS OF THE YEAR 1926

Similar to Photograms and containing reproductions of work from the Australian Salon, with critical review. Price, paper \$2.59, cloth \$3.50.

## THE JAPAN PHOTOGRAPHIC ANNUAL

Text partly in English, mainly in Japanese. Beautiful reproductions of Japanese work only. Price, \$3.00.

## DEUTSCHE CAMERA-ALMANACH

A literary and pictorial year book containing valuable articles in German and many beautiful pictures. Price, \$2.00.

## PHOTOFREUND-JAHRBUCH

Similar to the last, but a little larger in size of page. Text also in German. Price, \$2.50.

## LUCI ED OMBRE

An annual of Italian artistic photography, showing only the work of the Italian school. Strong and masterly. Price, boards \$2.50.

## XXIe SALON INTERNATIONAL DE PHOTOGRAPHIE 1926

The annual of the French Photographic Society, made up of pictures from the Paris Salon. Printed throughout in photo-gravure. Perhaps the most imposing of the world's photographic annuals. Price, \$3.50.

For sale by all dealers, or

## Nos. 1 and 1A Pocket Kodaks

*Picture Sizes:*

No. 1,  $2\frac{1}{4} \times 3\frac{3}{4}$  inches

No. 1A,  $2\frac{1}{2} \times 4\frac{1}{4}$  inches

SLIM, enduring beauty characterizes the appearance of these new Pocket Kodaks—capable simplicity marks their performance. Latest improvements make them fun to operate, convenient to carry. And, considering their fine equipment and finish, they are priced much lower than you would expect.

Nos. 1 and 1A Pocket Kodaks may be secured with either a Meniscus Achromatic or Kodar *f.7.9* lens. Kodex shutter comes with both models. Focus is thumb-adjusted with a handy worm screw. The bed is latched with a spring snap. Autographic? Certainly—with the slot countersunk, and the stylus mounted beside the shutter to prevent loss.

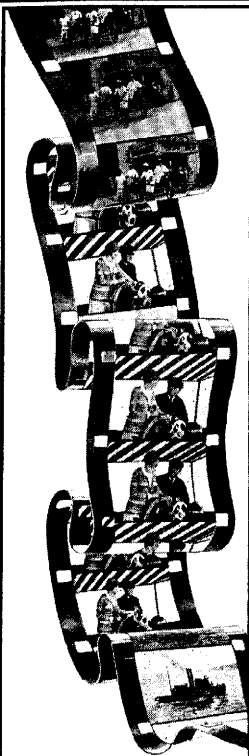

*Prices*

|   | No. 1   | No. 1A  |
|---|---------|---------|
| With Meniscus Achromatic lens . . . . . | \$ 9.00 | \$10.00 |
| With Kodar <i>f.7.9</i> lens . . . . .  | 12.00   | 13.00   |
| Black leather case with shoulder strap. | 2.50    | 3.00    |

*Aboard and Abroad*  
with a Ciné-Kodak

ADVENTURE lies ahead—new scenes, new customs, new faces. And *now* each one means a movie. Press the release on the Ciné-Kodak—you're making movies. Turn the switch on your Kodascope—you're seeing the movies you made.

And you can reasonably rent any of four hundred screen classics and animated cartoons from a Kodascope Library.

Ciné-Kodak B with *f*.6.5 lens, \$70; with *f*.3.5 lens, \$100. Kodascope C, \$60. A complete outfit now—Ciné-Kodak, Kodascope, screen—as low as \$140.

# AnSCO Bromide Paper

*A Different Kind of Bromide*

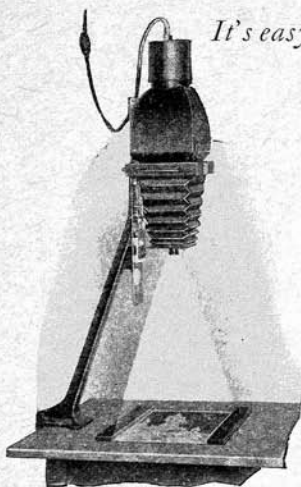

**W**E added ANSCO Bromide Paper only after years of costly research for a new emulsion formula. Except in speed, it differs noticeably from other bromides. It has more latitude in exposure, is more easily controlled, gives warmer tones and better blacks as natural characteristics, and delivers prints that match up in quality with contact work on professional portrait papers.

*Supplied in Standard and Brilliant grades, and in an interesting range of surfaces. Price list on request.*

## Kodak Auto-Focus Enlarger

ENLARGEMENTS whose fine quality equals professional work can easily be made at home with a Kodak Auto-Focus Enlarger.

The secret of this Enlarger's simplicity and reliability lies in its automatic focusing feature. Slide the camera up and the projected image grows larger. Move the camera down and the image becomes smaller. But it is always critically sharp—as sharp as the negative you're using. The scientifically designed cam-and-lever arrangement does the focusing for you.

Plate or film negatives up to 4 x 6 inches can be enlarged from 1½ to 3½ diameters. The largest possible prints are 14 x 21 inches—and you can make *any* of the sizes just as proficiently, and almost as rapidly, as you can make contact prints.

Kodak Auto-Focus Enlarger, with Kodak Anastigmat lens,  
electric cord and plug, six flexible metal masks.....\$33.00  
Diffusing Disc for soft focus effects..... 1.00

# Eastman Portrait Bromide Parchment Stock for Bromoils

Portrait Bromide, Parchment Stock is an exceptionally fine medium for the production of Bromoil prints and Bromoil transfers. It takes the ink very readily, is beautifully translucent and permits of unusual treatment in mounting.

Parchment Bromide Bromoils may be backed up with papers of brilliant color which materially alter the tone of the print. When dried without pressure and mounted loose they have the uneven surface characteristic of the finest parchment.
